

Zurich Commercial Insurance Benelux is hiring!

Zurich Commercial Insurance Benelux is part of the Zurich Group and is one of the most specialized insurance companies within non-life insurance for local and international business in the Benelux market.

Within Commercial Insurance Zurich offers a broad range of local and international insurance solutions from medium local to large multinational companies. Understand, manage and cover risks is crucial to be successful in a complex and fast changing environment.

We would like to attract new risk engineers with a passion for assessing operational risks in a changing business environment as part of the overall strategy 'together for our customers'. We are looking for operational risk advisors who are able to combine their technical expertise with business knowledge helping our customers to achieve their risk management objectives in a pragmatic way, but also advising our underwriters supporting their risk selection process.

Are you ready to start a new adventure contributing to an important change process within a market leader of the insurance industry?

Currently we are looking for a M/F:

Risk Engineer

Key Accountabilities

- Support external customers by identifying, assessing and providing effective advice on risk management issues to reduce the risks that they face individually, and on an overall account basis.
- Provide appropriate risk improvement advice, conduct loss investigations (including both trend and root cause analysis), and implement risk improvement programs.
- Assess the quality of moderately complex risks as described in the appropriate standard(s) and related competency level, and assess loss potentials in accordance with agreed definitions.
- Anticipate, recognize and respond to the needs of customers by providing expert solutions and training to key customer(s), and contribute to Business Operation Profit through opportunity spotting and cross selling.
- Develop and maintain positive customer and business partner relationships, and collaborate with both customers and business partners to develop appropriate service plans.
- Resolve technical issues, problems and projects in reference to policies and procedures within a specific function or unit.

Requirements/Profile

- Engineering Bachelor degree (Chemical)
- Competency in all aspects of fire protection engineering
- 3 to 5 years' experience in assessing operational risks as an engineer working within one of the following areas of expertise:
 - A risk engineer working for an insurance or broker company
 - A SHE-Q officer working within a SHE-Q department or as process safety engineer within the chemical / petro-chemical industry
- Dutch and English
- Customer oriented relationship builder combining service excellence with consulting and negotiating skills
- Frequent travel
- Location: Den Haag

We offer

- An international, entrepreneurial and informal working environment
- Professional growth and development opportunities
- Market conform salary and benefits
